P.I.E-Peter Lang S.A., Editions Scientifiques Internationales, Belgium, 2008. Paperback. Condition: New. Language: French . Brand New Book. Les questions environnementales contemporaines sont éminemment complexes et reticulaires. La maniere privilegiee de les aborder consiste a s interesser aux moyens materiels et conceptuels employes par les acteurs eux-memes (gestionnaires, experts, riverains, etc.) pour diagnostiquer, pour se coordonner et pour agir. Nous verrons ainsi comment des cartes (d epandage ou d un reseau ecologique), des schemas (d aménagement d un site classe), des fiches projets (d une politique de conservation de la nature), un tableau (de mise en correspondance des pratiques de consommation et de leurs impacts sur l environnement), un diagramme (dans le milieu de la production du boeuf bio) ou encore des concepts (de classement de zones humides ou de gestion d un lac) sont autant de reperes a la fois pour la description par l observateur de ce qui est en construction dans le travail de concertation, mais surtout pour l action meme des acteurs engages. Nous les appellerons, avec d autres, des objets et concepts intermediaires. Ces entites techniques - quelques fois esoteriques - suivies dans leurs elaborations ou dans leur detournement renseignent sur des representations des milieux et des ressources naturels et sur leurs transformations et peuvent etre de veritables mediatrices dans l emergence de dynamiques collectives originales. Elles constituent le fil d Ariane par lequel l environnement entre en societe.
