Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from *Corn Experiments, 1894* The season of 1894, while fairly favorable to the corn crop in central Illinois, was somewhat short in rainfall. The aggregate rain fall, inches, for the five months, May, June, July, August, and September was well distributed through these months. The mean temperature for each of the five months was slightly above the average of the same months for the past six years. Different parts of the tract used for the varieties showed marked variation in its capacity to withstand the drought, hence less importance should be attached to the yields of different varieties this year than to their average yields for a series of years. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
