

## Evaluation of Techniques for the Decomposition of EMG Signals

By Sharma, Tanu / Veer, Karan

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | This widely used text presents the fundamental concepts and techniques of modern digital processing, with related applications, covering both time domain and frequency domain methods for the analysis purposes. The present book provides the basic tenets of methodological research so that researchers may become familiar with the art of using concerned methods and techniques in biomedical instrumentation. The book can be taken as a well-organized guide for researchers whose methodological background is not extensive. The book will serve as text for the students of B.Tech, M.Tech and PhD (Electrical Engineering, Electronics Engineering and Biomedical Instrumentation Engineering). | Format: Paperback | Language/Sprache: english | 72 pp.

## Reviews

This book is great. I have go through and so i am confident that i will going to read through once again again in the future. I am just easily can get a satisfaction of looking at a written book.

-- Miss Vernie Schimmel

The book is easy in study easier to comprehend. I have study and that i am certain that i will gonna read once again once again in the foreseeable future. Your lifestyle span will likely be transform the instant you comprehensive reading this pdf.
